

Drag and Drop Modules - Interesting Moments Grid

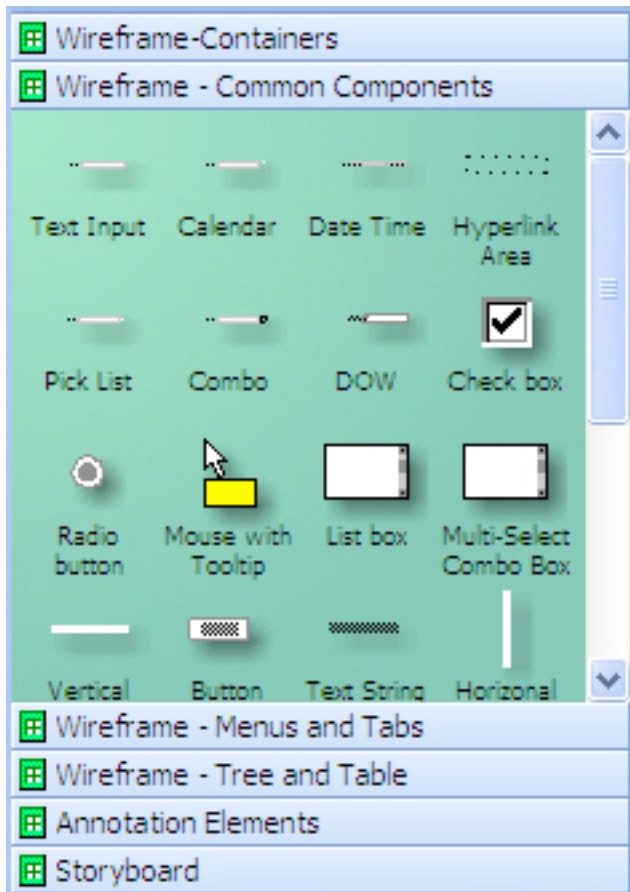

Mouse Down	Drag Initiated	Drag Over Valid Target	Drag Over Invalid Target	Drag Over Parent Container	Drop Accepted	Drop Rejected	Drop On Parent Container
on beta.my.yahoo.com	ID: Bill Scott & Eric Miraglia	Date: Nov-05					
Move cursor	CSS Move cursor	CSS Move cursor	CSS Move cursor	CSS Move cursor	Normal Cursor	Normal Cursor	Normal Cursor
							
Opacity	Reduced Opacity	Reduced Opacity	Reduced Opacity & Invalid Badge	Reduced Opacity	Modules animates into the area just below insertion bar	Modules animates back to the home area	Modules animates back to the home area
					Module comes to rest in new area	Module comes back to rest at full opacity	Modules comes back to rest at full opacity
							
Insertion bar, just a gap	No insertion bar, just a gap	Insertion bar showing where it will drop	No insertion bar, just a gap	No insertion bar, just a gap & original hole	Insertion bar is removed as first frame of animation	Insertion bar is removed as first frame of animation	Insertion bar is removed as first frame of animation

- Drag & Drop Interesting moments
 - Page load
 - Mouse hover over drag-able object
 - Mouse down on drag-able object
 - Drag initiated (mouse down, mouse moves ≥ 3 pixels)
 - Drag over valid target area
 - Drag over invalid target area
 - Drag over original location
 - Drop accepted
 - Drop rejected
 - Drop on original location

- Drag & Drop actors
 - Page
 - Cursor
 - Tool Tip
 - Drag object
 - Drag ghost
 - Original location
 - Drop target

- Documentation has centered around layout, priority and behavior of content and functional items
- Interactions typically defined as discrete states (pages)
- Multiple page flow diagrams are now a single page with rich interactions
- Storyboarding provides a way to capture design flow

- Animations can provide timing in context
- Hard to capture branches
- Tools. Visio, Photoshop CS2, etc.

Connection Manager

The Connection Utility is a wrapper around asynchronous and synchronous http requests made via the XMLHttpRequest object. The utility provides browser abstraction, object pooling, error handling, status indication, and callback functionality, enabling rapid prototyping and construction of user interactions involving asynchronous transactions between client and server.

- Simulated Interaction with Visio

Participant Interface Notes

Title: Register page

Date: 18 July 2005

Version: 1.0

Functional Notes:

The registration page allows users to signup for Participate simply by entering a user name and a valid email address.

- 1 Provide the user with some notification of what the email a friend action is worth in Participant points to encourage follow-through and introduce non-registered users in the Incentive program.
- 2 On click, commit the user's entered email addresses and message, send to target addresses, and link user to a confirmation page
- 3 For users who have invited friends over email, provide reporting on # invited and # accepted. Hide actual names by default, but allow users to view them by clicking the "view" link

- a When user completes name entry and clicks to email entry, compare the entered name to previously claimed names on the site. If the name is a match, generate alternates that can be clicked on to fill the entry field.

The name ryan_c is unavailable.
How about:
ryan_c_01
iam_ryanc
ryan_c_ismc

↓ User makes selection or inputs new name that is valid & available:

That name works. Thanks!

- b Is it possible to treat the "submit" button click as a call to validate the form of the user's entered email? If there are any formatting errors, alert the user and prevent the page from loading the confirmation.

The address you entered isn't formatted properly.

branding & navigation

register

All we really need is a unique name and email, everything after that is gravy. Lorem ipsum dolor sit amet, nulla at fermentum nonummy turpis mauris rutrum justo, nec. Cras malesuada, nulla at fermentum nonummy.
