background.

Rico

JavaScript for Rich Internet Applications

Home Features Demos Documentation Downloads About

An open-source JavaScript library for creating rich internet applications. Rico provides full Ajax support, drag and drop management and a cinematic effects library.

BACKGROUND

Rico is a Spanish word meaning *rich*. The goal of Rico is to provide a rich experience for web sites using Ajax technology.

Rico is just one small part of a larger effort at Sabre Airline Solutions to create a suite of rich internet components, behaviors and effects for the web application space.

The library is a fully object-oriented JavaScript library. Recently we refactored the library to extend the excellent [prototype.js](#) effort from the Ruby on Rails folks.

OPEN SOURCE

Rico is provide free and open-source ([Apache 2.0 License](#)) for either your personal or commercial use. [Sabre Airline Solutions](#) retains the copyright on the Rico code produced at Sabre.

BROWSER SUPPORT

Rico has been tested on IE 5.5, IE 6, Firefox 1.0x/Win, Camino/Mac, Firefox 1.0x/Mac. Currently there is no Safari or Mac IE 5.2 support. Support will be provided in a near future release for Safari.

AJAX SUPPORT

Ajax is the term that describes a set of web development techniques for creating interactive web applications. One of the key ingredients is the JavaScript object XMLHttpRequest. Rico provides a very simple interface for registering Ajax request handlers as well as HTML elements or JavaScript objects as Ajax response objects. Multiple elements and/or objects may be updated as the result of one Ajax request.

Want to get started learning? Check out our [demos](#) and then read our two Ajax tutorials on the [Documentation page](#).

DRAG AND DROP

Desktop applications have long used drag and drop in their interfaces to simplify user interaction. Rico provides one of the simplest interfaces for enabling your web application to support drag and drop. Just register any HTML element or JavaScript object as a draggable and any other HTML element or JavaScript object as a drop zone and Rico handles the rest.

CINEMATIC EFFECTS

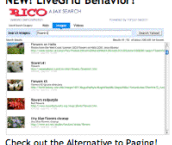

When actions are no longer occurring just at the page level but within the page itself, more clues are required to clue the user on what has transpired. Cinematic effects such as scaling and smooth sliding transitions can communicate change in richer ways than traditional web applications have explored before. Rico provides several cinematic effects as well as some simple visual style effects in a very simple interface.

BEHAVIORS

Take some raw HTML and sprinkle in some behaviors and what do you get? Well in Rico you can get an [accordian](#) component like those found in Macromedia Flex and Lasso. Just nest some DIVs and with one line of JavaScript turn your div panels into an accordian. And the latest behavior is the LiveGrid. LiveGrid allows you to connect an HTML table up to a stream of Ajax responses. Ajax requests are automatically called during table scrolling. The result is now HTML tables can hold an unlimited amount of data scrolled into view on the fly as needed! More behaviors are planned!

NEW! LiveGrid Behavior!

Check out the Alternative to Paging!

- ORGANIZE SCREEN/PAGE

Welcome

Welcome to the Yahoo! Design Pattern Library. We are very happy to be sharing our library with the design and development community. This is our first drop of what we hope to be a monthly release cycle for the publication of patterns. In many cases we have bundled the patterns with pointers to related code from the [Yahoo! User Interface Code Library](#). We hope this is a useful resource and look forward to your [feedback](#).

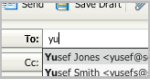

What's a Pattern?

A pattern describes an optimal solution to a common problem within a specific context. [more...](#)

Recent Patterns

Auto-Complete

The user needs to enter an item into a text box which could be ambiguous or hard to remember and therefore has the potential to be mis-typed.

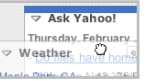

Breadcrumbs

User needs to navigate potentially large quantities of information efficiently, without becoming lost.

Drag and Drop Modules

The user needs needs to re-arrange the layout of modules on a web page directly with the mouse.

Module Tabs

The user needs to navigate through one or more stacked panes of content without refreshing the page.

Navigation Tabs

The user needs to navigate through a site to locate content and features and have clear indication of their current location in the site.

Object Pagination

The user needs to view data items from a potentially large set of sorted data that will not be easy to display within a single page.

Results Page:

1 2 3 4 Next

Search Pagination

The user needs to view a set of search results ranked by relevance that is too large to easily display within a single page.

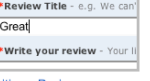

Rating an Object

A user wants to quickly leave their opinion on an object, with minimal interruption to any other task flow they are involved in.

Writing a Review

User wants to share her opinion with others about an object (place, person, thing) in greater detail than a simple rating.

The Yahoo! logo, featuring a purple 'Y' with an exclamation mark.

developer.yahoo.com/ypatterns

The image displays three overlapping screenshots of the Yahoo! Developer Network Design Pattern Library, specifically focusing on the 'Ratings and Reviews' section.

Top Screenshot (Design Pattern Library):

- Header: Developer Network Home, Help, Site Search, Search.
- Section: Design Pattern Library.
- Left Sidebar (USER NEEDS TO):
 - NAVIGATE: Breadcrumbs, Faceted Navigation, Fly-out Menus, Horizontal Bar, Hub and Spoke, Left Navigation, Tabs, Module Tabs, Navigation Tabs.
 - EXPLORE DATA: Auto Complete, Calendar Picker, Pagination, Item Pagination, Search Pagination.
 - ORGANIZE DATA.
 - GIVE FEEDBACK: Ratings & Reviews, Architecture Review, Rating an Object, Writing a Review.
 - PERFORM ACTION.
 - CUSTOMIZE: Drag and Drop, Drag and Drop Modules, Drag and Drop Objects, In Page Editing, Sliders.
 - APPLICATION NEEDS TO: CALL ATTENTION, IMPROVE READABILITY, GROUP RELATED ITEMS, ORGANIZE SCREEN/PAGE.
- Main Content: Welcome message, What's a Pattern? (A pattern describes an optimal...), Recent Patterns (Email form), Auto-Complete (The user needs to enter an item into a text box...), Module Tabs (The user needs to navigate through one or more stacked panes...), Search Pagination (The user needs to view a set of search results ranked by relevance...).

Middle Screenshot (Ratings and Reviews):

- Header: Developer Network Home, Help, Site Search, Search.
- Section: Design Pattern Library.
- Left Sidebar (USER NEEDS TO):
 - NAVIGATE: Breadcrumbs, Faceted Navigation, Fly-out Menus, Horizontal Bar, Hub and Spoke, Left Navigation, Tabs, Module Tabs, Navigation Tabs.
 - EXPLORE DATA: Auto Complete, Calendar Picker, Pagination, Item Pagination, Search Pagination.
 - ORGANIZE DATA.
 - GIVE FEEDBACK.
- Main Content: Ratings and Reviews. Problem Summary: User wants to leave an opinion or evaluate. Quick opinions can be captured using Reviews. Solution Patterns: Architecture of a Review (A product or website needs to present ratings and reviews with a variety of informational elements.), Rating an Object (A user wants to quickly leave their opinion on an object, with minimal interruption to any other task flow they are involved in.).

Bottom Screenshot (Rating An Object):

- Header: Developer Network Home, Help, Site Search, Search.
- Section: Design Pattern Library.
- Left Sidebar (USER NEEDS TO):
 - NAVIGATE: Breadcrumbs, Faceted Navigation, Fly-out Menus, Horizontal Bar, Hub and Spoke, Left Navigation, Tabs, Module Tabs, Navigation Tabs.
 - EXPLORE DATA: Auto Complete, Calendar Picker, Pagination, Item Pagination, Search Pagination.
 - ORGANIZE DATA.
 - GIVE FEEDBACK.
- Main Content: Rating An Object. Problem Summary: A user wants to quickly leave their opinion on an object, with minimal interruption to any other task flow they are involved in. EXAMPLE: Restaurant (Alma St, Menlo Park, CA 94025). Cross Street: Between Alma Ln and Ravenswood Ave. Rating: 5 stars (Average Rating (7) Read 7 reviews). Write a Review button. Use When:
 - A user wants to leave an opinion quickly.
 - Use in combination with reviews for richer experience.
 - Use to quickly tap into the existing "community" of a product.
 - Ratings are collected together to present an average rating of an object from the collective user set. Solution:
 - Show clickable items (most often used are stars) that light up on rollover to infer clickability.
- Right Sidebar (QUICK JUMP):
 - Solution
 - Rationale
 - AccessibilityRELATED PATTERNS:

Yahoo! Design Pattern Library Released

February 13, 2006 on 7:54 am by Bill Scott | In [Design](#) |

I'm excited to announce that today we are releasing the [Yahoo! Design Pattern Library](#) to the public under a friendly [Creative Commons License](#). The goal in releasing this library is for us to share the common patterns that we see emerging at Yahoo! It is hoped that by opening up our design patterns we can share our current thinking as well as solicit your valuable feedback.

We believe design patterns are [powerful](#). First, they offer a solution in context of a problem. Second, they provide a name for the solution. Taken together as a set, pattern libraries form a solution language that can enhance our ability to communicate design ideas. Lastly, they provide us a context in which to discuss a number of associated issues: the thinking behind a solution; issues around accessibility, and de-gradeability; other related patterns; examples of usage; and code samples to name a few.

In case patterns are a new concept to you, here's a little history to get you up to speed.

Background on Patterns

To see a product preview in action, hover over the link below.

Forty Associates recently added product previews to their Web site as part of a small beta program. During the beta, visitors to Associate sites who viewed a product preview clicked through to Amazon.com over 4% of the time; those clicks resulted in a purchase nearly 6% of the time.

Now we're opening the beta up to all Associates to further improve product previews. The first 500 Associates who refer a sale through a product preview-enhanced link will receive a \$5 Amazon gift certificate. [Click here to join your fellow Associates in beta testing product previews.](#)

Don't worry if you don't already have Basic Display Product Links on your Web site. You can create them as part of the sign-up process. [Click here](#) for answers to questions you might have about the beta program.

principle. keep a light footprint.

The screenshot shows a product page for a 'Pique polo' shirt. At the top, there's a shopping bag icon with '0 items in my bag' and a 'checkout' button. The product name 'Pique polo' is followed by 'only at gap.com'. Below this is a tabbed interface with 'overview' selected and 'you'll also like' as an alternative tab. The description states: 'Soft cotton pique knit. Short-sleeved, button neckline.' and lists features: 'Need large quantities? Click for Corporate Apparel' and '100% Cotton. Machine wash. imported.' There are two tabs for 'regular' and 'tall' sizes. A 'Buy More and Save' section shows a color selection for 'royal grape' with a price of '\$29.50' and a discount to '\$9.99' for buying two or more. Below this is a size selection area with buttons for XS, S, M, L, XL, XXL, and XXXL, along with a 'size chart' link. At the bottom, there's a quantity selector set to '1' and an 'add to bag' button.

pattern. Remembered Collection.

The screenshot shows a 'RECOMMEND THIS STORY' section. It includes a 'Recommend It:' prompt with five empty star icons. To the right, it says 'Average (63 votes)' and shows five filled red star icons. Below the stars is a 'pattern. Rating an Object.' text.

pattern. Rating an Object.

The screenshot shows a 'Classics' page. At the top, there's a 'Featured Subgenre CLASSIC COMEDIES' section. Below this is a 'Recommendations' section with two movie cards. The first card is for 'High Plains Drifter' by Clint Eastwood, showing a star rating of 4.5 and an 'Add' button. The second card is for 'The Great Escape' by John Sturges, also showing a 4.5 star rating and an 'Add' button. To the right of the recommendations is a 'Featured Subgenre CLASSIC COMEDIES' section with two more movie cards: 'Fun with Dick and Jane' and 'Monty Python's Life of Brian', each with a star rating and an 'Add' button. At the bottom right, there's a 'More Recommendations >' link.

The screenshot shows a Digg post titled 'Fixing the Mighty Mouse'. It has a yellow '282 diggs' badge and a 'digg it' button. The post is submitted by 'usedmac' 1 day 1 hour ago. The text of the post reads: 'The Apple Mighty Mouse brings a slew of great feat with most new Mac systems it is becoming a comm one for close to a year now, I have found that the us Scroll Ball far outweigh its quirks.' At the bottom, there are links for '60 comments', 'blog this', 'email this', and a category of 'apple'.

Welcome

Welcome to the Yahoo! Design Pattern Library with the design and development patterns that we hope to be a monthly release. We have bundled the patterns with the [Code Library](#). We hope this helps you.

What's a Pattern?

A pattern describes an optimal solution to a common problem.

Recent Patterns

- Auto-Complete
- Module Tabs
- Navigation Tabs
- Search Pagination

Problem Summary

User wants to leave an opinion or evaluation. Quick opinions can be captured using Reviews.

Solution Patterns

- Architecture of a Review
- Rating an Object
- Writing a Review

Rating An Object

Problem Summary

A user wants to quickly leave their opinion on an object, with minimal interruption to any other task flow they are involved in.

EXAMPLE:

Restaurant

Alma St
Menlo Park, CA 94025

Cross Street:
Between Alma Ln and Ravenswood Ave

Average Rating (7)
Read 7 reviews

Write a Review

Use When

- A user wants to leave an opinion quickly.
- Use in combination with reviews for richer experience.
- Use to quickly tap into the existing "community" of a product.
- Ratings are collected together to present an average rating of an object from the collective user set.

Solution

- Show clickable items (most often used are stars) that light up on rollover to infer clickability.

QUICK JUMP
